

WORK POSITIONERS

Work Positioners are small, lightweight and flexible; eases lifting and transport of goods in most industries, Electronic, Computer, Packaging, Pharmaceutical & Food. Literally all Industries. The perfectly centered weight distribution, short wheelbase and low self-weight makes our Work Positioners the safest and most manoeuvrable lifter on the market. The perfect solution for weights up to 250 kg. We can also modify and manufacture non standard equipment for that special application.

ADVANTAGES

- Very easy manoeuvrable
- Silent
- Service friendly
- Light self-weight
- Approved acc. EN 1757: 1
- Wide range of accessories

Extremely compact design makes it very easy to clean & manoeuvre.

Easily accessible and removable control unit. Ergonomically positioned to allow control even with both hands on the handlebars.

Dual speed raise and lower for safer, more precise control.

The unique positioning of the mast, at the rear of the chassis, distributes the lifting weight evenly over all four wheels.

Charge indicator high-lights battery condition.

Easily accessible charging cable.

Sealed maintenance-free battery with integrated automatic charger. Battery can not be overcharged.

Wheels with ball bearing and toe protection.

High lateral support stabilizes forks and loading levels.

Clamp safety function when lowering down.
